DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The abstract of the disclosure is objected to because the abstract is more than one page long and exceeds 15 lines of text. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hoffarth, U.S. Patent No. 5,705,476, with Bahrmann et al, U.S. Patent No. 6,482,972.

Hoffarth, U.S. Patent No. 5,705,476, discloses low-foaming wetting agents comprising 30-90% by weight of an ethoxylated alcohol of formula (Ia), wherein R¹ is isodecyl, and 0-30% by weight of an ethoxylated alcohol of formula (III), wherein R³ is a C₁₂₋₂₂ alkyl group (see abstract, col. 1, lines 45-col. 2, lines 46, and col. 2, line 66-col. 3, line 11). It is further taught by Hoffarth that the low-foaming wetting agents are used for treating textiles (see abstract and col. 4, lines 10-24), per the requirements of the instant invention. Specifically, note the Examples in Tables 1-5. The examiner asserts that the alkoxylates disclosed in Hoffarth would inherently contain both alkoxylates of 2-propyl-heptanol and alkoxylates of 2-propyl-4-methyl-hexanol, as required in instant claim 12, since the technical grade of 2-propyl-heptanol inherently contains the isomer 2-propyl-4-methyl-hexanol, absent a showing otherwise. Also note that Bahrmann et al, U.S. Patent No. 6,482,972, discloses that 2-propyl-heptanol contains the isomer 2-propyl-4-methyl-hexanol (see Examples 1-7 of Bahrmann et al, U.S. Patent No. 6,482,972). Therefore, based on this evidence, the examiner asserts that the alkoxylates disclosed in Hoffarth would inherently contain both alkoxylates of 2-propyl-heptanol and alkoxylates of 2-propyl-4-methyl-hexanol, absent a showing otherwise. Thus, claims 11-18 are anticipated by Hoffarth, U.S. Patent No. 5,705,476.

In the alternative that the above disclosure is insufficient to anticipate the above listed claims, it would have nonetheless been obvious to the skilled artisan to produce the claimed composition, as the reference teaches each of the claimed ingredients within the claimed proportions for the same utility.
